

LIGHTING THAT OUTPERFORMS

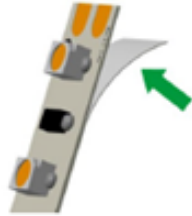

SINCE 1998

HIPPO CLIP LED STRIP JOINING SYSTEM

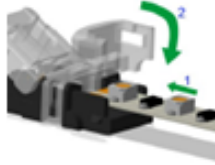

Hippo clips are a new and no fuss method of joining LED strip lighting. They achieve a secure joint and electrical contact without the need for soldering which is time consuming and hazardous. Hippo clips are available for single colour, RGB and RGBW strips, are available for indoor and outdoor LED strip and come in strip to strip and strip to tail wire versions.

1. Cut the strip to your required length at the terminal markings.

2. Peel a small section of the backing tape from the end of the strip that the strip requiring joining.

3. Insert the strip into the slotted end of the Hippo clip until it is all the way in.

4. Snap down the cover and the connection will have been secured.

5. Repeat the process on the opposite side of the clip.

USLJOINER-8-OA

Hippo clip for 8mm LED strip to strip connection. For single colour OUTDOOR strip.

USLJOINER-8-OA-C

Hippo clip for 8mm LED strip to wire connection. Comes with AWG20 tail wire. For single colour OUTDOOR strip.

USLJOINER-10-OA

Hippo clip for 10mm LED strip to strip connection. For single colour OUTDOOR strip.

USLJOINER-10-OA-C

Hippo clip for 10mm LED strip to wire connection. Comes with AWG20 tail wire. For single colour OUTDOOR strip.

USLJOINER-RGB-I

Hippo clip for 10mm RGB LED strip to strip connection. For RGB INDOOR strip.

USLJOINER-RGB-C-I

Hippo clip for 10mm RGB LED strip to wire connection. For RGB INDOOR strip.

USLJOINER-RGB-OA

Hippo clip for 10mm RGB LED strip to strip connection. For RGB OUTDOOR strip.

USLJOINER-RGBW-I

Hippo clip for 12mm RGBW LED strip to strip connection. For RGBW INDOOR strip.

USLJOINER-RGBW-C-I

Hippo clip for 12mm RGBW LED strip to wire connection. For RGBW INDOOR strip.

USLJOINER-RGBW-OA

Hippo clip for 12mm RGBW LED strip to strip connection. For RGBW OUTDOOR strip.
