

LIGHTING THAT OUTPERFORMS

SINCE 1998

SYNTHESIS HIGH LUMEN LED BATTEN

FEATURES

31.2mm thickness powder coated aluminum body, performs superior heat dissipation and rust resistance.

Non-discoloring opal polycarbonate diffuser with no glare.

Built-in reliable LED driver, with wide range voltage input and constant current output.

Low energy /exceptional illumination - generates around 100 lumens per watt.

Very easy to install, with replaceable super bright SMD LED strip.

Clean, compact, modern design.

Extremely reliable - utilizes the LEDs with a lifespan of up to 50,000 hours.

Non-dimmable (Dimmable - made to order).

Operating temperature: -20°C to +40°C

Suitable for use in residential, office, commercial and othe indoor lighting applications.

Replacement Warranty : 3 Years.
